The website has 7 recommended corrections

Meta tags

1

The title is too long. This has a significant impact on the low rankings in search engines!

```
<style data-href="https://static.parastorage.com/services/wix-thunderbolt/dist/...
<style data-href="https://static.parastorage.com/services/wix-thunderbolt/dist/...
<title>sonoran oasis landscaping - landscaping companies,
professional landscapers and professional landscaping
companies</title>
<meta name="description" content="one of tucson's professional land...
<link rel="canonical" href="https://www.sonoran-oasis.com"/>
```

2

The website description (metatag: description) is too long. This has a significant impact on the low rankings in search engines!

```
<style data-href="https://static.parastorage.com/services/wix-thunderbolt/dist/...
<title>sonoran oasis landscaping - landscaping companies, professional landscaper...
<meta name="description" content="one of tucson's professional
landscaping companies for homeowners associations, residential, and
commercial properties. sonoran oasis landscapi...
<link rel="canonical" href="https://www.sonoran-oasis.com"/>
<meta property="og:title" content="sonoran oasis landscaping - land...
```

Properly optimized meta tags should give users as much information as possible about the content of the website so that it is easier for browsers to index it, and thus raise their search ranking.

Website content

3

Iframe tags were detected in the website's code, it may significantly lower your ranking in Google!.

```
<p class="font_9 wixui-rich-text__text" style="line-height:1.875em; f...
</li>
<iframe class="nkphmk" title="wix chat&quo t; aria-label="wix chat"
scrolling="no" allowfullscreen="" allowtransparency="true&qu ot;
allowvr...
<!-- preloading pre-scripts -->
```

4

There is a low amount of keywords in the content of the website. This has a significant impact on the low rankings in search engines!

5

There are no internal links in the website's content related to the main keywords, this has a large impact on the page's ranking!

Well-chosen and error-free page content is crucial in the optimization process. We therefore recommend that you make all of the above changes to the website's content and code so that its content is understandable to search engines and can gain higher rankings.

Google tools

6

Search engine blocking (disallow) phrases were found in the robots.txt file, this may have a negative impact on Google indexing your content

We have detected errors on your website that may cause your website to be downgraded by Google or even banned from searches altogether. In addition, the absence of Google analytical tools installed may also affect the website's position in the ranking.

Performance results

7

Your performance could be better.

The performance of your website has some problems and can be improved. Efficiency is important to ensure a good user experience and reduced rejection rates (which may also indirectly affect search engine rankings). We recommend that you read the factors highlighted below.
